## How to Get a Mac as Secure as Possible

Being one of the most advanced computer devices Mac offers abundant useful security & performance features to users. These devices come installed with the latest security mechanism to keep your data and security intact. It is also a common belief that it is hard to infect a Mac device in comparison to any other system.

Keep your system up to date, both macOS and installed software

## **Protecting your privacy**

Turn on FileVault to encrypt your data

Do not share your location with every app

## How to Get a Mac as Secure as Possible

Spotlight helps you quickly find things on your computer and shows suggestions Internet, Music, App Store, movie showtimes, locations nearby, and more.
